### **Education**

# **Bachelor of Computer Science**

Sapienza University of Rome 2025-Current

#### **Bachelor of Philosophy**

Tor Vergata Rome University 2016-2020

### Stack

- React
- Tailwind
- Spring Boot
- Laravel
- Angular

# Language

- Italian
- English

#### **Hobbies**

Outside of work, I channel my creativity into graphic design, focusing on creating grunge-inspired posters.

I'm also a self-taught guitarist in love with Britrock and Post-Punk music scene.

### About Me

Full Stack Developer with a designer's eye for detail, shaped by a natural evolution from Web Design to frontend and ultimately full-stack development. My academic journey has been unconventional: I first earned a degree in Philosophy and now I'm fully immersed in studying Computer Science.

# **Work Experience**

### **Full Stack Developer**

2025-Current

Poleepo

- Full-stack development and maintenance of features within a Javabased microservices architecture using Spring Boot.
- Design and implemention third-party marketplace integrations
- APIs integrations for national and international shipping carriers to streamline logistics.
- Develop Java & Spring Boot microservices to automate and support e-commerce operations.

#### Web Developer & Designer

2022-2025

Marketing Therapy

- Led the web development team, overseeing project execution and workflows reporting directly to the Head of Production.
- Architected and developed modern headless web solutions, building dynamic React frontends connected to a WordPress REST API backend.
- Drove the entire lifecycle of web projects, from UI/UX design and R&D to final development.

#### **Graphic Designer**

2015-2022

Freelance

- Designed and produced a variety of graphic assets for independent brands, including promotional materials, event posters, and merchandise.
- Designed website mockups and wireframes, translating brand identity into compelling User Interface (UI) concepts.
